

# GOT CUTBACK? NO PROBLEM.

## RENOVATOR<sup>®</sup> CBR 970

Stauf CBR-970 Renovator is a single component polymer adhesive designed specifically for the installation of wood flooring over old existing cutback mastic. Other adhesives require complete removal of the old cutback before a new adhesive can be used. CBR-970 will bond permanently to the old cutback without removal, making installation a breeze. Now with CBR-970 just smoothing out the high spots and spreading over the old cutback saves time and money. Stick with what works.

Stick with what works.
