Dear Stauf Adhesives Customer:

Thank you for your inquiry about Stauf Adhesives and for your interest in using construction materials that meet or exceed environmental indoor air quality standards in both Europe and the US.

STAUF USA, LLC, is proud of their record as a leader in the development of environmentally friendly products. Stauf is a founding member of the Association for the Control of Emission in Products for Flooring Installation (GEV), a European industry association, whose goals are to promote the safety of consumers, trades and the environment in the field of chemical construction materials. You will find that our products have received the GEV's highest certifications for meeting environmental standards, the coveted EMICODE EC1[®].

We are also a member of the U.S. Green Building Council (USGBC), a 501(c)(3) non profit composed of leaders from every sector of the building industry working to promote buildings and communities that are environmentally responsible, profitable and healthy places to live and work. USGBC has developed the LEED[®] (Leadership in Energy and Environmental Design) Green Building Rating System. The LEED Rating System is the nationally accepted benchmark for the design, construction, and operation of high performance green buildings.

With this document, STAUF USA declares that the products listed in the attached "LEED Qualified Products" comply with Rule 1168 of California's South Coast Air Quality Management District's Volatile Organic Compounds (VOC) limits. These are the mandatory requirements set by the USGBC LEED program for Indoor Environmental Quality.

These Stauf products can contribute to your qualification efforts for LEED certification under Indoor Air Quality Section 4.1 – Low Emitting Materials: Adhesives and Sealants, as specified in the Green Building Rating System guideline V.2.2. The intent of this LEED credit is to reduce the quantity of indoor air contaminants that are odorous, potentially irritating, and / or harmful to both installers and occupants.

You may find additional information for download from our web site at www.staufusa.com. Or you may call us at 866.GLUE USA (866.458.3872).

Thank you for your interest and for your support of the use of environmentally sound products in your profession.

Cordially,

David Ford
Vice President, Sales and Marketing

Stauf's LEED Qualified Products

WOOD FLOOR ADHESIVES:

- **WFR-930 SOLVA-MASTIC:** an alcohol based wood floor adhesive that contains no water or isocyanates. VOC content @ 90 g/L is below the SCAQMD Rule # 1168. It cleans easily with Acetone or Mineral Spirits. It is a “green” product that meets strict environmental and health standards in the US.
- **SMP-960 ONE-STEP:** a MS Polymer based wood floor adhesive that contains a protective moisture and sound reduction barrier in the same application. It has a STC and IIC sound rating of 72 and 74 dB. It contains no water, no solvents and no isocyanates. VOC content is zero. It cleans easily with Acetone or Mineral Spirits. It is a certified “green” product that meets the strictest environmental and health standards in Europe and the US.
- **SMP-940 SUPERIOR:** a MS Polymer based wood floor adhesive that contains no water, no solvents and no isocyanates. VOC content is zero. It cleans easily with Acetone or Mineral Spirits. It is a certified “green” product that meets the strictest environmental and health standards in Europe and the US.
- **M2A-900 ECO-MASTIC:** a PVA-dispersion (water) based wood floor adhesive that contains no solvents and no isocyanates. VOC content is zero. It cleans easily with soap and water. It is a certified “green” product that meets the strictest environmental and health standards in Europe and the US.
- **PUM-950 POWER-MASTIC:** a urethane based wood floor adhesive that contains no water or solvents. It does contain isocyanates which may harm wood floor finishes. It contains zero VOC's. It cleans easily with Acetone or Mineral Spirits when wet, or with Stauf Urethane Remover Gel when dried. It is a certified “green” product that meets the strictest environmental and health standards in Europe and the US.

PRIMERS:

- **AQP-200 ECO-PRIME:** a PVA-dispersion (water) based floor primer used with water-based adhesives on concrete or wood sub floors. It contains no solvents or VOC's. It is a certified “green” product that meets the strictest environmental and health standards in Europe and the US.
- **URP-250 POWER-PRIME:** a urethane based floor primer used with urethane and MS Polymer based adhesives. It contains no water, no solvents and no VOC's. It is a certified “green” product that meets the strictest environmental and health standards in Europe and the US.

SEALERS:

- **URP-260 TRUE-SEAL:** an urethane based floor sealer that creates a moisture barrier for up to 8#/24hrs/ 1,000 SF of moisture in concrete sub floors. It contains no water, no solvents and no VOC's. It is a certified “green” product that meets the strictest environmental and health standards in Europe and the US.
