ONE-STEP[®] SMP960

FOR INNOVATIVE MS POLYMER TECHNOLOGY
THAT SAVES TIME, MONEY AND MATERIALS,
THERE'S ONLY ONE. ONE-STEP SMP-960.

NUMBER ONE FOR A REASON.

Stauf leads and others follow. Backed by six generations of technological innovations, Stauf's One-Step[®] SMP-960 wood floor adhesive is the only 3-in-1 application. Originally introduced in Europe, our unique polymer formula now sets the standard in America.

ONE STEP. COUNTLESS BENEFITS.

Other wood floor adhesives waste time and effort because they don't include barriers to protect against moisture and sound in one step. So you have to spread the glue, then the underlayment, wait for it to cure, then come back a day later and spread adhesive again before putting down the floor. Stauf gets it done in one easy step.

ELIMINATE MOISTURE & SOUND IN ONE STEP.

Sound barrier, moisture barrier and fast installation – all in one package. Plus there's no water, solvents, or isocyanates. So it won't damage the wood and it cleans easily without etching the surface. No wonder so many installers stick with Stauf.

IT'S WHAT'S **NOT** INSIDE THAT COUNTS

Stauf's One-Step[®] SMP-960 wood floor adhesive contains no isocyanates to etch wood flooring finishes. Plus there's no water, solvents or volatile organic compounds, so it won't warp the wood or harm the environment.

Other benefits include:

- Protects against up to 12# of moisture while meeting STC and IIC sound codes- all in one application.
- Non-slump formula spreads easily and bridges normal gaps between wood flooring and sub floor to grab and hold the floor down.
- Superior flexibility and moisture-retarding capability keeps floor in place, while allowing for normal seasonal movement over the life of the floor.
- No flash time, so installation can start right away to speed installation and save costs.
- Spreads easily and cleans even easier with acetone or mineral spirits.
- Nonflammable and ozone friendly.
- Certified "Green" by Europe's environmental council GEV.
- Stauf is a member of the US Green Building Council.
