

## Technical Information #13

### LEED AND STAUFG ADHESIVES

Stauf Adhesives, USA, is proud of its 'green' products and its history as a leader in the environmental community. As a founding member of Europe's Association for the Control of Emissions in Products for Flooring Installation (GEV), Stauf Adhesives have earned the highest environmental ratings for its products, the EMICODE EC 1.

That ranking allows Stauf products to meet the requirements for LEED points. Specifically, in these categories for Indoor Environmental Quality (IEQ) LEED points found in the USGBC, you will find Stauf products which qualify for:

- IEQ Credit 4.1: Low-Emitting Materials- Adhesives and Sealants 1 Point
- IEQ Credit 4.2: Low-Emitting Materials- Paints and Coatings 1 Point
- IEQ Credit 4.3: Low-Emitting Materials- Flooring Systems 1 Point

The following Stauf products can be confidently used for LEED credits:

#### WOOD FLOOR ADHESIVES:

- **M2A-900 ECO-MASTIC** - a water-based adhesive that spreads easily, cleans with soap and water, and exceeds all green standards
- **WFR-930 SOLVA-MASTIC** - an alcohol-based adhesive that has the grab and strength of the old solvent-based adhesives without the environmental and health issues
- **PUM-950 POWER-MASTIC** - a urethane-based adhesive like no other. Since it has no isocyanates, it won't etch the floor finish and it has no suspected carcinogens. It spreads and cleans easier than competitors' traditional urethane adhesives.
- **SMP-940 SUPERIOR** and **SMP-960 ONE-STEP** - polymer-based adhesives that won't etch the finish, that spread and clean easily, and (960 only) provide a sound and moisture barrier that exceeds standard building codes for apartments, condos and offices.
- **CBR-970 RENOVATOR** - polymer-based adhesive for use over existing cut-back adhesive without having to remove it. Will not dissolve cut-back; simply knock off high spots and level.

#### PRIMERS AND SEALERS:

- **-AQP-200 ECO-PRIME** - a water-based primer that provides a dust-free, evenly absorbent surface for installation of leveling compounds or adhesives.
- **-ACS-210 TRUE-SEAL** - a water-based sealer that bars moisture up to 8#, contains no solvents or VOC's, and dries in less than two hours to a clear coat.
