

URETHANE. PERFECTED.

Introducing a totally new and improved type of urethane wood flooring adhesive, Stauf's one-of-a-kind PUM-950. No special solvents required for clean-up and no problem cleaning up after it's cured. No etching and wasted time dealing with call-backs. No isocyanates to harm the planet, making it safer for installers too. And nobody else has it. No wonder so many installers stick with Stauf.
