

# GOT MOISTURE? NO PROBLEM.

## PERMA-SEAL® ERP 270

Stauf ERP 270 is a two component epoxy sealer used for subfloor moisture mitigation. A moisture barrier of up to 18#’s or 97% RH may be achieved at an applied rate of 140 SF/Gal or a moisture barrier of up to 25#’s or 100% RH may be achieved at an applied rate of 70 SF/Gal. Couple that with the ability to apply adhesive directly to the epoxy sealer and you have a complete adhesive and sealer system without any steps in between.

Why risk any installation to a damp sub floor? Stick with what works.

Stick with what works.
