

# CURED URETHANE? NO PROBLEM.

**NOW WITH  
MOISTURE CONTROL!**

POWER MASTIC™  
**PUM 950**

Our patented isocyanate free moisture cured urethane is a single component, easily troweled urethane that provides trouble free installation and clean up. While obtaining a very high shear strength, PUM 950 is still easily removed from the finished surface of hardwood flooring. PUM 950 can also be used as a moisture mitigation system when used with our #12 trowel. In a one step process, moisture mitigation of up to 10lbs or 88% RH can be achieved with one pass of the trowel. When installing your next hardwood floor, choose PUM950 for the easy clean up and the unmatched performance. Stick with what works.
